Hiring Manager

PT Infineon Technologies

Batam, Indonesia

Dear Hiring Manager,

I am writing to apply for the **Staff Engineer Unit Process Development** position at PT Infineon Technologies. I am currently in my final semester of **Electronic Engineering Technology**, and I expect to graduate in **August this year**. While studying, I have also been working at **PT SWSBI** as a **Design Development Staff**, where I have gained useful experience related to engineering and production.

At PT SWSBI, I support the **Japan Sumitomo Development Department**, help **plan new product trials**, and work on **analyzing and improving wire harness production**—focusing on **productivity, quality, and cost efficiency**. I also work as an **interpreter**, helping different teams communicate clearly. This experience has helped me become better at problem-solving, teamwork, and working with technical processes.

I am very interested in PT Infineon's work in semiconductor technology and would be excited to contribute to your process development team. I am eager to learn more and ready to give my best to support your company's goals.

Thank you for considering my application. I hope to have the opportunity to discuss how I can be a good fit for this position. I am available anytime for an interview.

Sincerely,

Hendra Kurniawan
